

16. CAROTID PROTOCOL

1. Sag Prox CCA
2. Sag Distal CCA w/ Prox ECA
3. Sag Distal CCA w/ Prox ECA w/ color
4. Sag Distal CCA w/ Prox ICA
5. Sag Distal CCA w/ Prox ICA w/ color
6. Doppler most proximal straight section of CCA
7. Doppler Distal CCA only if stenosis present
8. Doppler highest ECA velocity
9. Doppler entire ICA to locate highest velocity
10. Doppler ICA in second location
11. Vertebral velocity to determine flow direction
12. Repeat on other side.
